Subject: RE: Manhasset, NY electric consumption

I would also mention that there have been constant renovation projects occurring in vacant store spaces and car park adjacent to the Tiffany store during this time frame – is it possible the electric bills have been influenced by this?

Thank you,

Brian

For the 9/19 - 9/27 period there was nothing unusual going on that would point to an increase in electrical power. The HVAC has been operating normally.

Recently, we did have scheduled power shutdowns for LIPA upgrades. This was on Sunday night, November 5 and Sunday night, November 19.

Is there anything else that may have caused the increase?

Bruce Edson
Operations Manager
Manhasset

Bruce: Can you try and respond to this at your best recollection?

Sandy

Sandy,
Look at this info from NUS and send it to the operations manager at Manhasset. You need to ask them if anything unusual was going on to cause such an increase in electrical power during the last 8 day period as compared to the other days. Are the HVAC units shutting down at night?

Bruce,

We have been looking at the bills for your Manhasset store and note an unusual usage pattern for last August and September. Are you aware of anything going on during the time periods listed on the attached sheet that would cause such a fluctuation in kWh usage?

Hope all is going well.

Regards,
Chris
